

THE GROUP

1. WHO WE ARE
2. WHAT WE DO
3. WHO HAS CHOSEN US

1. WHO WE ARE

Digital Engineering S.r.l. Next Software Generation leverages over 20 years of experience in the Information Technology field, positioning itself as the ideal partner for all companies that have chosen innovative technologies as a growth tool in the market.

Values

Our reference points are ethical, deontological, and social values, attention to quality, full customer satisfaction, the spirit of innovation, and a passion for technological research.

Team

Our team consists of highly qualified and experienced IT consultants and specialists. This enables us to accompany our clients and provide the best solution.

Experience

The skills we have acquired span various technological fields and the most sought-after areas in the market: healthcare, transportation, commerce, logistics, public administration, and military institutions.

1. WHO WE ARE

Digital Engineering initially started as a software house. Quality services and customer satisfaction have led the company to become a group, acquiring other local entities with high competence and specialization.

1. WHO WE ARE – Startup Incubator

We are Business Incubator

For this reason, in 2019, Pepeeta was born:

an innovative startup that operates independently and integrally as a provider of technology and distributed ledger solutions.

The platform is based on an original blockchain protocol and a secure, unique, indelible, and traceable ecosystem.

We support entrepreneurs and project leaders in taking their first entrepreneurial steps, offering them administrative and organizational services to transform ideas into sustainable realities.
